Midwest warrants products purchased hereunder to be free of defects in materials and workmanship, from the date of shipment for the period of time as follows:

This warranty shall not apply in the event products are damaged as a result of misuse, abuse, neglect, accident, improper application, modification or repair by persons not authorized by Midwest, where the products are damaged during shipment, or where the date stamps on the product have been defaced, modified or removed, unless considered unenforceable or unlawful under applicable law. All implied warranties including, but not limited to, warranties of merchantability and fitness for a particular purpose are hereby excluded. Purchaser's remedy, if any, for any defective products shall be limited to a refund, replacement or adjustment by Midwest of the products at Midwest's option and shall, in no event, include damages of any kind, whether incidental, consequential or otherwise.

306FN

308FN

The plywood frame is literally the backbone of this time tested folding table design. Attractive high-pressure laminate, bonded to a sheet of tempered hardboard, provides a durable surface for many years of demanding use. Pedestal style legs feature a 1.05" diameter, 14 gauge steel tube base to support heavy loads without bending.

The **midwest** Advantage

A plywood frame supported by a 16 gauge steel channel frame resists impact damage and carries heavy loads with ease.

Extra thick, 14 gauge steel leg base stands up to heavy use without bending. Non-removable, high impact plastic leg glides protect floors.

Leg braces incorporate spring loaded, case hardened steel detents for long life and fast set-up & tear-down.

Tops are reinforced against breakage with a square corner steel frame.

SPECIFICATIONS

TOPS - EF Series Tops are constructed of solid, $\frac{3}{4}$ " thick, AC grade, exterior glue plywood, surfaced with high pressure plastic laminate and backed with a phenolic sheet to prevent moisture penetration. Tops are edged with $\frac{3}{8}$ " thick, vinyl T-molding, secured with staples from the underside of the table top at regular intervals.

TOP SUPPORT STRUCTURE - Table tops are supported by a formed steel channel frame of $1\frac{1}{4}$ " deep 16 gauge steel. Frames are secured to the table top with screws placed no greater than 10" apart.

LEG ASSEMBLIES - Leg assemblies are wishbone style, constructed with one-piece load bearing vertical members of 1.05" diameter, 14 gauge steel tubing. Each leg is capped with high impact plastic glides, secured with internal spring steel grippers. Tables less than 48" in length or diameter are furnished with independent folding legs of 1.05" diameter, 14 gauge steel tubing. *Comfort Leg* assemblies are constructed of $1\frac{1}{4}$ " diameter steel tubing.

LEG BRACE MECHANISMS - Folding leg braces are constructed of $\frac{1}{8}$ " wide, $\frac{1}{8}$ " thick edge radiused steel. Coil-spring actuated, case-hardened steel detents engage mating holes in the brace to secure the brace automatically when it is opened. Leg braces are attached to leg assemblies and pivot bracket by the use of steel shoulder rivets.

METAL FINISH - All metal parts are thoroughly cleaned and phosphatized to enhance paint adhesion. Metal parts are then finished with a thermofused epoxy powder coating.

**The laminate surface on these models is made from two pieces of plastic. A seam will be visible with all top colors, however, wood grain patterns help make seams less visible.

LW SERIES, lightweight folding tables are precision molded from durable, ABS plastic. Extra thick, extruded ABS bumper molding protects the edges against damage. Tables feature solid plastic, internal reinforced corners and spring-bolt actuated leg brace mechanisms. Standard models are furnished with wishbone style legs and are available in three standard plastic colors.

Specialty models are available in red, green, yellow and blue tops. Adjustable legs, that feature easy 1" height adjustment without the use of tools, are also available.

630LWJ

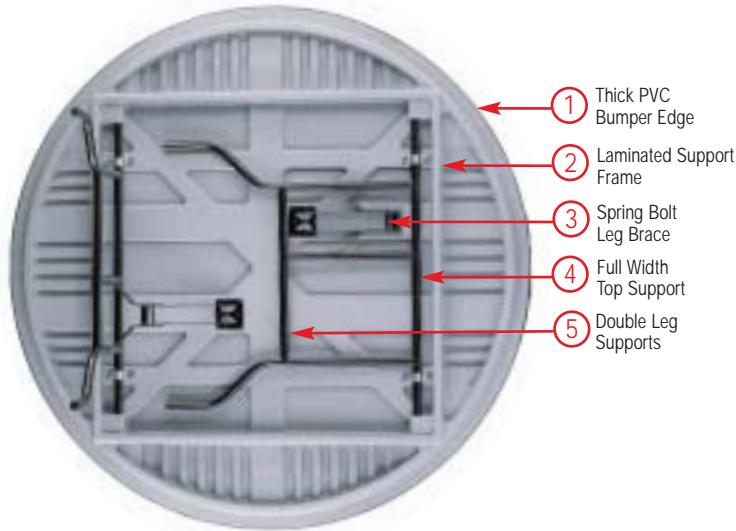

630LW

R60LW

The **midwest** Advantage

SPECIFICATIONS

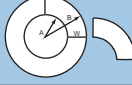

TOPS - Tops are constructed with two thermoformed sheets of heavy gauge ABS plastic molded to encase a structural frame of laminated wood. Impact absorbing reinforcements of injection molded ABS plastic provide protection to the corners of rectangular tabletops. High impact, ABS bumper molding shields the edges of the tabletop.

LEG ASSEMBLIES - Leg assemblies are wishbone style, constructed with one-piece load bearing vertical members of 1" diameter, 16 gauge steel tubing. Legs are capped with high impact plastic glides, secured with internal spring steel grippers. Tables less than 48" in length or diameter are furnished with independent folding legs of 1.05" diameter, 14 gauge steel tubing.

LEG BRACE MECHANISMS - Folding leg braces are constructed of 7/8" wide, 1/8" thick edge radiused steel. Coil-spring actuated, case-hardened steel detents engage mating holes in the brace to secure the brace automatically when it is opened. Leg braces are attached to leg assemblies and pivot bracket by the use of steel shoulder rivets. Pivot brackets are anchored to the table tops with screws and flathead bolts and locking nuts.

METAL FINISH - All metal parts are thoroughly cleaned and phosphatized to enhance paint adhesion. Metal parts are then finished with a thermofused epoxy powder coating.

SPECIFICATIONS

TOPS - F Series Tops are constructed of solid, $\frac{1}{2}$ " thick, 47lb industrial grade, particle-board, surfaced with high pressure plastic laminate and backed with a phenolic sheet to prevent moisture penetration. Tops are edged with vinyl T-molding, secured with staples from the underside of the table top at regular intervals.

TOP SUPPORT STRUCTURE - Table tops are supported by a formed steel channel frame of 1- $\frac{1}{8}$ " deep 16 gauge steel. Frames are secured to the table top with screws placed no greater than 10" apart.

LEG ASSEMBLIES - Wishbone leg assemblies are constructed with one-piece load bearing members of 1.05" diameter, 14 gauge steel tubing. Pedestal style legs are constructed with base sections of 1.05" diameter, 14 gauge tubing and all other components being of 1" diameter, 16 gauge tubing. Legs are capped with high impact plastic glides, secured with internal spring steel grippers. Tables less than 48" in length or diameter are furnished with independent folding legs of 1.05" diameter, 14 gauge steel tubing.

LEG BRACE MECHANISMS - Folding leg braces are constructed of $\frac{1}{2}$ " wide, $\frac{1}{8}$ " thick edge radiused steel. Coil-spring actuated, case-hardened steel detents engage mating holes in the brace to secure the brace automatically when it is opened. Leg braces are attached to leg assemblies and pivot bracket by the use of steel shoulder rivets.

METAL FINISH - All metal parts are thoroughly cleaned and phosphatized to enhance paint adhesion. Metal parts are then finished with a thermofused epoxy powder coating.

Cafeteria Seating

FOLDING BENCHES

Folding benches offer an economical solution for your cafeteria seating needs. Benches may be folded quickly for compact storage. The sturdy frame and heavy-duty leg design provides safe seating for adults. A durable high-pressure laminate surface stands up to many years of frequent cleaning and constant use.

If other than standard height is desired, height options TLA-1 or TLA-2 must be specified.

Comfort Leg tables for classroom, seminar and training facilities offer unobstructed knee space not available with other folding tables. Tables quickly fold for compact storage when required, yet are incredibly stable when opened for use. Conference/utility models look good enough for the boardroom, but their plywood core tops provide the durability to withstand many years of rough use.

FA SERIES - HEIGHT ADJUSTMENT

Leg braces incorporate spring loaded, case hardened steel detents for long life and fast set-up & tear-down.

Optional solid $\frac{3}{4}$ " thick plywood is surfaced with high pressure plastic laminate, sealed with a backing sheet and edged with thick vinyl molding.

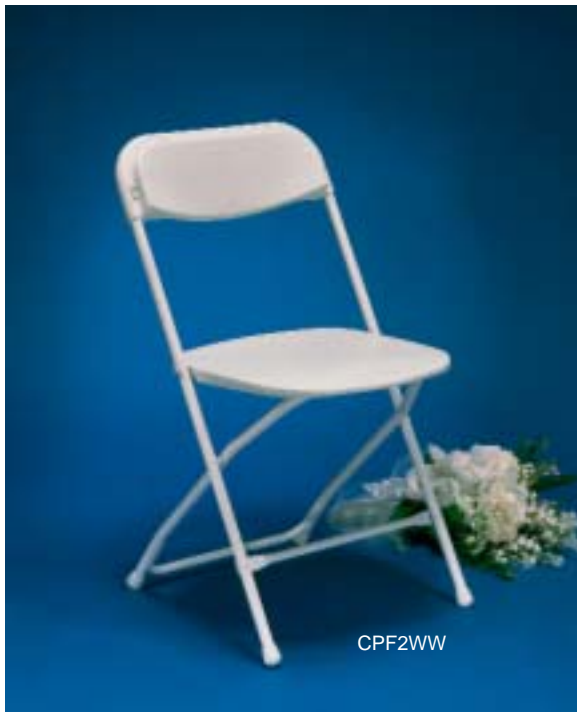

To adjust, simply press the snaplock button and slide the leg insert to the desired position.

CPF2WW

Midwest's Folding chairs are specially designed for easy handling and compact storage. Their light weight makes it easy to carry a number of chairs at one time to reduce set up and tear down time. Designed to nest when stacked, as many as 68 chairs may be stored and moved on our convenient flat stacking caddy. Up to 120 chairs may be moved and stored on our two-tier caddy for optimum convenience.

Seats and backs are injection molded of resilient, high-impact polypropylene plastic that is easy to clean and durable enough to withstand many years of tough use. Our chip resistant, powdercoated enamel finish protects the frame and makes cleaning easy.

Weight: 22 lbs 35 lbs

Riser shelf may also be used with most folding tables.

Folds for compact storage

Mobile Utility Tables facilitate the display and movement of equipment, supplies, instructional materials, exhibits and classroom demonstrations throughout your facility. Ideal for use in the classroom, cafeteria, media center, gymnasium and office, mobile utility tables eliminate the need for your staff to hand-carry heavy tables. Plastic laminate tops with plywood core construction and heavy-duty steel frames, assure long-term durability.

 20-24 (18"W x 96"L tables)

TEC

Model No: TEC
Size: 49"L x 31½"W x 32¼"H
Weight: 64 lbs
Capacity: 8 (rectangular/serpentine tables)

10
YEAR
WARRANTY

Modular design allows the flexibility to vary the number of levels to suit the specific needs of each performance. Heavy-duty plywood core deck construction is reinforced by a 16 gauge steel channel frame. Legs of 1.05" diameter, 14 gauge steel tubing are braced with spring-bolt locks to support the heaviest loads with complete safety. Units fold for compact storage and are conveniently stored and transported on double tier caddies.

10
YEAR
WARRANTY

Midwest portable stage platforms may be ordered in the same height to assemble a performing stage, or they may be ordered in up to 5 different heights to construct seated band and choral risers. Units fold to store in less than 2" in height when stacked. Dual height models allow easy conversion from seated risers to performing stages when needed. Units are constructed of heavy gauge steel and laminated plywood core decking for unsurpassed safety and durability. Unfold from storage to setup in seconds. Sturdy for long life and rigid for perfect safety. Shipped completely assembled.

The **midwest** Advantage

Stage and riser decks are constructed with solid plywood, laminated with tempered hardboard on top and bottom. Decks are surrounded and supported by 16 gauge formed steel channels for maximum carrying capacity.

Integral drop-in couplings allow stage and riser sections to be ganged together at the same level when set up as a stage, or to be ganged at different levels when set up in a riser arrangement.

DUAL HEIGHT MODELS

Changing heights is easy with our adjustable height mechanism. Just remove the pin, pull out the leg, flip the leg 180°, push the leg back in and re-install the holding pin.
